Support Engineer Job – Charlotte NC

Description

Support Engineer Job, Charlotte NC

AT-NET Services is looking for a Help Desk Support Engineer to implement, maintain, and support our growing client base's technology infrastructures. You will be part of a systems engineering team that is responsible for designing and developing scalable, maintainable, highly available technology architectures that meet business objectives and SLAs.

This position is responsible for supporting and maintaining the design and integrity of client systems and implementing projects.

Responsibilities

Key Accountabilities:

- Providing tech support to clients with a focus on quick resolution of incidents, and high client satisfaction
- Analyzing, troubleshooting, and resolving hardware, operating system, and application issues
- Liaising with vendors, suppliers, and internal teams
- Keeping our client and related internal documentation up to date
- Continuously learn the latest technical best practices to improve efficiency
- Escalation of tickets as per our escalation process
- Work within established configuration and change management policies to ensure awareness, approval and success of changes made to client network infrastructure

Technical Requirements:

- Strong understanding, troubleshooting skills and hands on working knowledge of:
 - Microsoft Azure, Microsoft 365, and related cloud applications
 - Microsoft Windows Server Operating systems and Microsoft application servers
 - Microsoft Windows Desktop Operating systems and Microsoft Applications
 - VMWare providing ongoing support
- Hands on working knowledge of IP routing and switching including VLAN, DHCP, MPLS, VPN, SD-WAN when troubleshooting issues on routers, switches, and firewalls.
- Basic knowledge and understanding of PowerShell scripting
- Basic knowledge of information security and best practices
 - Experience with CIS Controls, CMMC or NIST a plus
- Experience in ConnectWise Automate, Manage, GMS, and Logic Monitor a plus
